E. CHANDU REDDY

7386277072 | chandureddyeddala@gmail.com | linkedin.com/in/chandureddy7 | Hyderabad

PROFESSIONAL SUMMARY

Cybersecurity student specializing in ethical hacking and penetration testing, with hands-on experience in CTF competitions and security labs. Proficient in Kali Linux, Nmap, and Wireshark for identifying and exploiting system vulnerabilities. Skilled in developing custom security tools using Python, with a strong foundation in computer networking principles.

PRACTICAL EXPERIENCE

Ethical Hacking Hackathon *Supraja Technologies*

- Performed hands-on penetration testing on live web applications and network services in a time-bound competitive environment.
- Intercepted and modified HTTP requests using Burp Suite to identify and exploit a price manipulation vulnerability in an e-commerce application.
- Analyzed network traffic using Wireshark to detect insecure authentication mechanisms and extract clear-text credentials from unencrypted login sessions.

PROFESSIONAL TRAINING & DEVELOPMENT

Six-Month Cyber Security Diploma — Craw Security, Hyderabad *Aug 2024 – Present*

- Pursuing intensive, hands-on training in ethical hacking, penetration testing, and web application security.
- Completed Linux module with practical experience in **command-line operations**, **user and permission management**, **process control**, and **basic shell scripting**.
- Currently progressing in computer networking, focusing on **OSI and TCP/IP models**, **subnetting**, **routing fundamentals**, and **network protocols**.
- Actively learning Python for cybersecurity, emphasizing scripting fundamentals and security-related automation use cases.

TECHNICAL SKILLS

- **Operating Systems:** Kali Linux, Windows
- **Networking:** TCP/IP, OSI Model, Subnetting, Packet Analysis
- **Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit (Beginner)
- **Core Concepts:** Reconnaissance Techniques, Cryptography

PROJECTS

PyScan — Custom Port Scanner & Network Mapper *Python*

- Engineered a multithreaded network mapping tool in Python to perform efficient host discovery and port scanning, inspired by Nmap.
- Implemented TCP SYN scanning to identify open ports and ICMP probes to detect live hosts on a network.
- Integrated basic banner grabbing functionality to fingerprint services running on open ports.

EDUCATION

B-Tech, Cybersecurity *2022 – 2026*
Sri Venkateswara College of Engineering, Tirupati **| CGPA: 8.04**

Intermediate (MPC) *June 2020 – April 2022*
Narayana Jr. College, Chittoor **| 72%**

Class X *2020*
Narayana High School, Chittoor **| 96%**

CERTIFICATES

- Learn Ethical Hacking by Zaid Sabih — Udemy
- Introduction to Networks — Cisco Networking Academy
- Google Cybersecurity Certificate (Coursera) — Foundations of Cybersecurity
- Google IT Professional Certificate (Coursera) — Tools of the Trade: Linux and SQL
